

The Breakdown

On-Premise

Cloud Computing

VS.

Cost

Stable costs over time

Cost increase of
325%
over a five-year
period

Security

Privately owned and operated by your trusted professionals

Shared servers with other companies, potentially competitors, and fully owned and operated by a

THIRD PARTY

Control

Control is retained by the enterprise throughout the lifetime of the data

Data is often encrypted by the cloud provider, meaning downtime results in no access to data
